(54) Title: A CASHFLOW FUNDING SYSTEM

Flow of Data between Local Merchant Application and Remote Host Application

(57) Abstract: A funding system including a local processor operable by a broker, the local processor including an input means to allow the broker to input data in respect of a funding request, and the local processor analysing the data using predefined rules to determine whether funding will be offered in response to the funding request; and wherein the local processor synchronises data with a central processor.
